## **Quality Policy:**

Oakwood Business Systems is committed to developing innovative computer design and build techniques that offer the customer the highest reliability, functionality, lowest cost, and that meet international safety and performance standards.

## **To accomplish this goal we:**

- Consistently use a working methodology where both customer and end user demands, together with expectations, are analysed
- Use highly qualified professionals with innovative capabilities and reward them appropriately
- Equipping employees with the competencies necessary to achieve their objective
- Ridged adherence to procedural production quality monitoring
- Rapid action to resolve any technical issues that become apparent.
- Constantly adapt quality assurance to meet the customers needs
- Train all employees in company policies and procedures.
- Aim to improve product safety and performance
- Aim to lower costs of ownership of products by use of innovative use of energy saving system components

Oakwood Business Systems commits itself to make the necessary resources available to apply the corporate quality policy and make it succeed.
